Pulp, Paper and Fibre-based Packaging (PPP)
Roadmap: v0 for Input and Comment
December 2020
About Version 0 of the PPP Roadmap

The Forest Positive Coalition Pulp, Paper and Fibre-based Packaging (PPP) WG has developed this working draft of the Roadmap and is now inviting input and comment from stakeholders before producing Version 1 of the final document.

Please send any comments to cgfroadmaps@proforest.net or by using the online form available on the CGF website here by 31st January, 2021.

The PPP WG will review all the input received and use it to produce Version 1.

The Roadmap will be a living document which will be regularly reviewed and updated based on experience and continuing engagement with stakeholders.

Section 1: About the CGF Forest Positive Coalition of Action
The Consumer Goods Forum (CGF) has created the Forest Positive Coalition of Action, led by 17 companies with a collective market value of US$1.8 trillion, to leverage collective action and accelerate systemic efforts to remove deforestation, forest degradation and conversion from key commodity supply chains, while supporting sustainable forest management, conservation and restoration.

In 2010, the CGF Board made a resolution to mobilise resources to help its members achieve zero-net deforestation by 2020. The strategy was rooted in remediating individual company supply chains, often through certification – ensuring that the sourcing of key commodities would not deplete tropical rainforests. While progress was made by CGF members in reaching this goal, companies realised that acting individually would not accelerate progress as much as collective action.

The Forest Positive Coalition was launched to leverage the collective action of its member companies to use their collective influence to drive and accelerate efforts to remove deforestation from not only their own commodity supply chains, but across their suppliers’ entire supply base.

The Coalition believes that its collective reach will enable members to make progress on four goals:

1. Accelerate efforts to remove commodity-driven deforestation from individual supply chains.
2. Set higher expectations for traders to act across their entire supply base.
3. Drive transformational change in key commodity landscapes.
4. Define measurable outcomes on which all members agree to track and report individually and collectively.
Members and Governance

Co-Sponsors: Alexandre Bompard, CEO, Carrefour, and Grant F. Reid, Chairman and CEO, Mars, Incorporated

Co-Chairs: Chris McGrath, Vice President and Chief of Global Impact, Sustainability, and Well-being, Mondelez International, and Bertrand Swiderski, Sustainability Director, Carrefour
Partnerships

- The Coalition is supported by the Tropical Forest Alliance (TFA) and Proforest, both of which provide key logistical and implementation support.

- The Coalition also works with the CGF’s Human Rights Coalition – Working to End Forced Labour (HRC) to align the Coalition’s Theory of Change, Roadmaps and strategies with the CGF’s Priority Industry Principles against forced labour.
Four Elements of New Strategy

Underpinning the actions of the Coalition is the new Theory of Change, based on the 7 Levers of Change (see Box). This reimagining of the strategy – based on extensive consultation – is also supported by a Coalition Charter and will help Coalition members drive more impactful collaborations.

Moving from deforestation-free to forest positive businesses: The 2020 commitment focused on deforestation, but over the last ten years companies have realised that addressing the loss of natural vegetation is complex, involving an interplay of environmental, social and economic factors all of which need to be considered. Coalition members recognise that being a forest positive business means making systemic efforts to remove deforestation, forest degradation and conversion from key commodity supply chains, while supporting sustainable forest management and restoration, to ensure the business is positively impacting the world’s forests, supporting the rights of workers and local communities and improving their livelihoods.

Based on 18 months of consultations, 7 Levers of Change were identified which are needed to support the transition to forest positive. Some of these can be led by supply chain companies, while others need leadership from other stakeholders.

1. **Supply Chain Management** – from producers through traders and buyers, implement policies and practices that incent conversion free production and dis-incent production linked to conversion.

2. **Jurisdictional Wins** – intense focus on the supply side levers (1, 2 and 3) in a specific geography to create success stories to protect key places and catalyze further action.

3. **Forest Positive Policies** – for producer countries, narratives about standing forests as a resource, not an obstacle to economic development that catalyzes political will. For developed countries, trade policies supportive of protection and restoration.

4. **Reduce Dependence** – identify ways to shift demand away from materials driving forest risk to those with low forest risk – avoiding other sustainability impacts.

5. **Demand Shift** – create a desire to protect forests in consumers and then wherever it exists, convert that latent desire into product choices.

6. **Capital Markets** – for financial institutions attached to supply chains, shift capital towards conversion free production and away from conversion.

7. **Carbon Markets** – expand the scope of global carbon markets (both compliance and voluntary) and recognize forest carbon in those markets – e.g. REDD+. 
From commitments to action: The goal of the Coalition is to drive actionable change on the ground to deliver real, forest positive results. Coalition members commit to actions and to also regularly reviewing progress to adjust course when needed. This commitment being operationalised through the development and implementation of the Commodity Roadmaps, which set out the Coalition’s planned actions for the coming 2-3 years and will be regularly reviewed and updated.

From own supply to suppliers and landscapes: One of the most important findings from the review of the 2010 resolution was that there is a limit to the progress that can be made by focusing only on individual supply chains. Therefore, based on a review of the different levers of change needed to move to a forest positive future, the approach of the new Coalition is based on a Theory of Change that builds on:

- Working with suppliers on deforestation-free businesses
- Collaborating to support progress in production landscapes
Maximising collective impact through **Coalition-wide Actions**: The Commodity Roadmaps will guide specific actions for each commodity, but based on inputs from stakeholders we have also developed Actions across the Coalition to make sure we maximise our collective leverage across companies and commodities. The four Coalition-wide Actions are:

- Supplier and trader engagement
- Transparency and accountability
- Production landscapes
- Government and stakeholder engagement

Further information and updates on each of these will be provided on the CGF Forest Positive Coalition [website](#) and through regular stakeholder engagement meetings.
The Commodity Roadmaps

The Coalition is creating Roadmaps for three commodities: palm oil, soy, and paper, pulp and fibre-based packaging (PPP). The Roadmaps have been developed to set out in detail what these commitments and actions are for each commodity, complementing the Coalition-wide Actions and providing commodity-specific detail. Development of each Roadmap has been undertaken by working groups of member companies and has involved active participation of all the members of the group. There has also been input from stakeholders, and ongoing discussions will continue to inform updates and revisions to the Roadmaps.

The Roadmaps are designed to be living documents which member companies will discuss, review and update regularly. This will be informed both by experience of implementation and by input from stakeholders and supply chain companies. Supporting implementation of the Roadmaps will be the CGF Sourcing Guidelines for each commodity. These were created to support implementation of the 2010 resolution, but will be updated and expanded.

Each Roadmap has been developed to reflect the specific realities and challenges of the commodity. The roadmaps build on five main elements that combine action both within and beyond supply chains. Our members will:

1. **Manage their individual supply chains**, working proactively to ensure their own supply bases meet the aligned commitments of our roadmaps.
2. **Work with our suppliers**, engaging to implement the same commitments across their entire commodity operations.
3. **Monitor production bases**, actively identifying and responding to conversion as quickly and effectively as possible.
4. **Engage in landscapes**, working collaboratively with other actors to support forest conservation and restoration with positive outcomes for local communities.
5. **Promote transparency and accountability**, committing to regular reporting against agreed on indicators.

Subsequently, each of these five elements include:

- **Commitments** all members agree to achieve
- **Actions**, both individual and collective, that member companies will implement to deliver on the commitments
- **Key performance indicators** (KPIs) on which member companies agree to report to provide transparency and demonstration of progress
Section 2: Introduction to the PPP Roadmap
Introduction to the PPP Roadmap

The Consumer Goods Forum (CGF) and its members recognize their responsibility to ensure that the sourcing of pulp, paper and fibre-based packaging (PPP) does not contribute to deforestation. There is an increasing pressure on forests due to factors such as farming, forestry, population growth, renewable energy and consumption and increasingly also from climate change effects and natural disasters. Unlike agricultural commodities, which replace natural vegetation, PPP can be about sustainable management of forests and thus, be part of the solution rather than the opposite. Responsible forest management can help increase the value of standing forests and help protect them from illegal logging, conversion to other uses or other non-sustainable activities. The PPP supply chain is well on the way to implement systems and solutions to combat deforestation in the areas where wood-based raw materials are sourced. However, we see the need to push for more sophisticated solutions that include deforestation and degradation but also better management of forests, working to ensure all stakeholders with an interest in the forest are involved in its management.

In recent decades, successful progress has been made towards this goal using forest certification. Given that still only a fraction of the world’s forests are certified, increasing the area of production forest that is certified is one of the key solutions for this commodity. Thus, central to the Coalition’s approach is continuing to promote credible certification where applicable. Furthermore, there are places where engagement beyond certification is needed to tackle underlying governance issues and drive change. The Coalition acknowledges the need for further action in priority countries and regions where there is still a risk of supply from controversial sources and where forest management must improve and will take action through engagement with priority upstream suppliers and landscapes.

Certification – a key to combat deforestation

Transparency and traceability within the supply chain are key requirements to verify that the fibre is sourced in an environmentally, economically and socially responsible way. Third party verification systems have been developed with the purpose of assuring the buyer that a product has come from a forest and supply chain that is managed responsibly. When timber leaves a certified forest management unit, the certification guarantees companies along the supply chain that the timber meets legality requirements and the certification schemes’ best practice standards. Certification schemes provide monitoring systems and tools to keep certified and non-certified materials separated throughout the supply chain. In addition, the certification process requires a third-party review, verification and audit. The Chain of Custody standards by both FSC and PEFC are also usually accepted as proof of legal origin of the fibres.

2Companies in the food and beverage industry use several types of fibre-based packaging, including corrugated board, paperboard and wrapping. Each type of packaging uses a varying amount of virgin pulpwood and/or recycled fibres.

3See more on how the FSC is organized, including the role of NGOs, at www.FSC.org. Also see how PEFC is working on their website www.pefc.org.
Introduction to the PPP Roadmap

The CGF Forest Positive CoA PPP Working Group: Taking Action Towards a Forest Positive PPP Sector

The PPP Working Group of the Forest Positive CoA is composed of manufacturers and retailers who are committed to working towards a forest positive future for the PPP sector. Following the Coalition’s theory of change, the group aims to:

• Accelerate efforts to remove PPP-driven deforestation from our individual supply through credible certification, increased transparency and optimization of fibre use;
• Do business with upstream suppliers who are also committed to forest positive implementation across their business;
• Engage with suppliers and landscapes in priority countries and regions where there is still a risk of supply from controversial sources to promote sustainable forest management, forest protection and restoration and drive transformational change;
• Transparently report on progress to ensure accountability

The PPP Roadmap lays out the specific commitments, actions and KPIs that the group will implement to drive change, recognising equal responsibility but different activities for retailers and manufacturers. Building on the progress made by other initiatives in the PPP sector, the PPP WG will focus on actions where members’ collaboration can add the most value towards a forest positive sector:

• Working individually and collectively to implement commitments through timebound action plans and clear targets
• Collectively engaging with certification schemes to improve transparency and traceability, resolving existing issues and collaborating to increase the area of production forest that is certified
• Collectively engaging key upstream suppliers in priority countries and regions to deliver on commitments across their entire businesses through the communication of Coalition expectations and the monitoring of their performance
• Identifying priority PPP countries and regions for engagement and contributing to landscape initiatives to promote forest positive production of PPP
• Improving transparency in the supply chain through the alignment of reported KPIs

Scope: The PPP WG will focus initially on packaging as this is an area with significant collective leverage. However, members should implement forest positive commitments individually across all forest products. The scope of collective action within the Coalition will gradually expand to include all pulp & paper products.
Section 3: The 5 Elements of the PPP Roadmap

1. Own Supply Chain
2. Suppliers & Traders
3. Managing High-risk Origins
4. Landscape Engagement
5. Transparency & Accountability
Element 1: Own Supply Chain

Commitments & Actions
Transparency & Accountability
1. Own Supply Chain: Commitments & Actions

Coalition Members Commitments

1.1 Develop and implement a forest positive PPP sourcing policy that minimizes risk of sourcing from controversial sources or areas that have been converted from natural ecosystems. The policy goals should include:

- Virgin fibre is certified to a credible third-party standard or equivalent assurance;
- There is transparency/traceability of virgin fibre origin, at least to country of harvest;
- There is further engagement in priority countries and regions where there is still a risk of supply from controversial sources through engagement with suppliers and landscapes;
- Fibre use is optimized through use of recycled and alternative fibres and increased efficiency.

Use the CGF PPP Sourcing Guidelines or equivalent to guide implementation

Notes: ‘Controversial sources’ include:

a) Illegally harvested wood;

b) Wood harvested in violation of traditional and civil rights;

c) Wood harvested in forests in which high conservation values are threatened by management activities;

d) Wood harvested in forests being converted from natural and semi natural forest to plantations or non-forest use.

This will be further elaborated building on FSC and PEFC definitions and discussions with key stakeholders in the revised CGF PPP Sourcing Guidelines in 2021

Coalition Actions

Q1 2021 and ongoing: Review and Update the CGF PPP Sourcing Guidelines and include:

a. Controversial sources definition

b. Credible certification schemes and equivalent assurance guidance

c. Summary of priority countries where there is a high risk of sourcing from controversial sources (see Element 3)

d. Guidance on engagement in high priority countries and regions to identify and manage controversial sources

2021: Engage with certification schemes on (a) increased transparency and traceability to country of harvest for certified material; (b) resolving any specific issues; (c) collaborating to increase the area of production forest that is certified; (d) smallholder inclusion

2021: Share and develop guidance on tools/resources to help members implement commitments, building on members’ experience, AFi and other relevant initiatives

2021: Review Guidance with particular focus on accessibility for any smaller companies or companies based in more challenging regions with lower starting points

Individual Actions

Q1 2021: Develop a forest positive PPP sourcing policy and a timebound action plan for implementation in line with the CGF PPP Sourcing Guidelines.

Q1 2021: Review current performance against the KPIs, and commit to and take timebound action if not fully delivering

2021 and ongoing: Report on progress using agreed KPIs at least annually

Note: For retailers individual actions will focus on own brand manufacturers initially.
### 1. Own Supply Chain: Transparency & Accountability

Overview: The goal is for every member’s own supply chain to be as transparent as possible, including the company’s commitments and action plan, the progress made and remaining work to be done. While the focus of the Roadmap is on virgin fiber, the use of recycled material will be promoted and is included in the CGF PPP Sourcing Guidelines. All members are committed to annual reporting on KPIs, with recommendations for more frequent reporting for some information.

<td></td>
</tr>
</tbody>
</table>

Public Information from Members

- PPP Sourcing Policy including commitment to the forest positive goals
- Timebound action plan summary

*Note: the ambition is to work on greater traceability to country of harvest and to build in a KPI on ‘% of virgin supply traceable to origin’ next year.*
Element 2: Suppliers

Commitments & Actions

Transparency & Accountability
2. Suppliers: Commitments & Actions

Overview: Central to the FP Coalition ToC is that transformation of PPP production to forest positive across the entire sector can only be achieved if upstream suppliers also implement Forest Positive commitments across their entire PPP business. Therefore, the Coalition members (manufacturers and retailers) are committed to doing business with upstream suppliers who in turn are committed to forest positive implementation across their business – the Forest Positive Suppliers Commitment.

Actions focus on direct and upstream suppliers sourcing from priority countries and regions, and collective engagement will be directed where there is significant collective leverage. With these actions, the Coalition aims to scale up the uptake of certification and promote forest positive sourcing across suppliers’ PPP businesses. It is important that unintended consequences such as smallholder exclusion are adequately addressed.

<table>
<thead>
<tr>
<th>Coalition Members Commitments</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2.1</strong> Communicate the ‘Forest Positive Suppliers’ Commitment and specific Coalition Ask with suppliers and upstream actors and implement through individual procurement systems</td>
</tr>
<tr>
<td><strong>2.2</strong> Collaborate with suppliers/traders to address barriers to sector-wide progress</td>
</tr>
</tbody>
</table>

**Note:**
Forest Positive Suppliers: The Forest Positive Coalition Theory of Change recognises that to support sector-wide progress it is important to work beyond individual supply chains. One of the main pillars of the approach is ‘Forest Positive Suppliers’ which sets out the intention of Coalition members to ask their suppliers to develop and implement forest positive policies themselves across their entire PPP business, and for Coalition members to actively seek to do business with suppliers who are also committed and taking action to implement their commitments.

<table>
<thead>
<tr>
<th>Coalition Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Q1 2021: Document Coalition expectations of direct suppliers and of upstream actors, particularly those sourcing from priority countries/regions (see Element 3), including greater uptake of certification and systems to manage controversial sources across their PPP business</td>
</tr>
<tr>
<td>Q1/Q2 2021: Develop and communicate associated KPIs and agree how progress can be monitored and reported</td>
</tr>
<tr>
<td>Q1/Q2 2021: Identify priority suppliers for engagement including both those where there is significant collective leverage (e.g. large upstream suppliers such as mills) as well as small suppliers who may need support</td>
</tr>
<tr>
<td>2021: Engage identified suppliers as a Coalition to communicate the Coalition Ask, discuss progress in performance, and drive delivery across their business</td>
</tr>
<tr>
<td>2021: Share and develop guidance and tools for members and suppliers on implementation, building on members’ experience and AFI</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Individual Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td>2021: Engage direct suppliers and key upstream actors by:</td>
</tr>
<tr>
<td>• Requesting/Promoting the uptake of credible third-party certification where possible, including Chain of Custody</td>
</tr>
<tr>
<td>• Actively engaging to promote implementation of forest positive sourcing across their whole PPP business (linking to the Collaborative Action)</td>
</tr>
<tr>
<td>• Actively engaging with the suppliers sourcing in countries where certification is not an option to promote sustainable forestry or is known to not adequately address all risks</td>
</tr>
<tr>
<td>2021 onwards: Work with procurement team to ensure there are internal systems in place that drive consequences for good or bad supplier performance</td>
</tr>
<tr>
<td>2021 onwards: Report on progress using agreed KPIs at least annually</td>
</tr>
</tbody>
</table>
## 2. Suppliers: Transparency & Accountability

**Overview:** The goal is to combine aligned Coalition member transparency with increased transparency from the priority suppliers engaged to make it easy to track progress towards a forest positive PPP sector, but also (and equally important) to identify areas where challenges remain or progress is slow so that the Coalition can take further action.

This will require a combination of individual and collective reporting. As members identify opportunities for collective engagement with priority suppliers in 2020, they will work together to develop effective KPIs to measure progress.

<table>
<thead>
<tr>
<th>Publicly reported KPIs</th>
<th>Comments</th>
<th>Manufacturers</th>
<th>Retailers</th>
<th>Rec</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Proportion of suppliers informed about the Forest Positive Suppliers approach</td>
<td>A key action for the coming year will be for members to inform suppliers (or the suppliers of own brand manufacturers) about the Coalition approach and expectations as this is quite new in the PPP sector</td>

<td>The focus initially will be on own brand suppliers</td>
<td>Ann</td>
</tr>
<tr>
<td>• Number or proportion of suppliers identified as priority for engagement, and % engaged</td>
<td>This will involve reviewing all suppliers and identifying as a priority for engagement those that a) are not supplying certified products, or b) are sourcing from origins with a high risk of controversial sources, or c) are not committed to a forest positive approach across their whole supply base</td>
<td>% by volume or number of direct suppliers</td>
<td>The focus initially will be on own brand suppliers</td>
<td>Ann</td>
</tr>
<tr>
<td>• Performance of engaged suppliers and changes over time including progress on delivery across entire business</td>
<td>This will be the change in performance over time including progress on delivery across entire business. Work is needed on what and how this reporting will be undertaken</td>
<td>Change in performance for all engaged direct suppliers</td>
<td>The focus initially will be on own brand suppliers</td>
<td>Ann</td>
</tr>
<tr>
<td>Collective reporting</td>
<td><em>Coalition can report collectively on engagement and progress for key upstream actors (e.g. mills). This could also include progress of collaboration to address sector-wide issues.</em></td>
<td></td>
<td></td>
<td>Ann</td>
</tr>
</tbody>
</table>
Element 3: Managing High-risk Origins

Commitments & Actions

Overview: Certification in the PPP sector has been quite successful at advancing sustainable forest management, but still only a fraction of the world’s forests are certified so there is still a need to increase the area of production forest that is certified. Furthermore, there are places where engagement beyond certification is needed to tackle underlying governance issues and drive change. The objective of this Element is to identify the priority countries and regions where there is a high risk of controversial sources related to PPP, for instance, due to lack of certification or weak governance. This information will be used to identify priority suppliers (Element 2) and landscapes (Element 4) for engagement.

Coalition Members Commitments

Build an understanding to align on managing origins with a high risk of controversial sources:

3.1 Identify priority countries and regions (countries or regions where there is a high risk of controversial sources related to PPP) building on existing tools/information

3.2 Use the information to inform engagement with certification schemes (Element 1), upstream suppliers (Element 2) and landscape initiatives (Element 4)

Notes:

(For the definition of ‘controversial sources’, see the Notes in Element 1)

Coalition Actions

• Q1 2021: Build a shared understanding among Coalition members of countries which are high priority for engagement, including priority issues in the different countries/regions, building on the existing CGF Sourcing Guidelines further informed by discussion with relevant external stakeholders (e.g., FSC, PEFC, CDP, AFI, local stakeholders) and experience of member companies.

• 2021: Engage collectively with certification schemes to address any issues identified with certification in particular countries or regions

Individual Actions

• 2021: Actively use the aligned prioritization to inform certification strategies (Element 1), assessment and engagement with priority suppliers (Element 2), and to plan engagement with landscape initiatives and governments (Element 4)

Note: We have not included KPIs for this Element since it is focused on building a shared understanding in order to take action in Elements 1, 2 and 4 which all have KPIs
Element 4: Landscape Engagement

Commitments & Actions
4. Landscape Engagement: Commitments & Actions

Overview: Central to the FP Coalition ToC is that transformation of PPP production to forest positive across the entire sector cannot be delivered by supply chain companies in isolation. Addressing ongoing deforestation and building Forest Positive production requires collaboration between companies, producers, local communities, government and civil society organisations.

To build this collaboration in practice, Coalition members will focus on actions in production landscapes and jurisdictions in the priority countries/regions identified through Element 3. Objectives of engagement include actively supporting and promoting credible certification as well as sustainable forest management in places where certification is not an option. A major focus of the Coalition approach will be to share learning and support good practice within the CGF and across the sector to drive progress towards a forest positive PPP sector.

This will be coordinated by the Tropical Forest Alliance (TFA) which was co-founded by the CGF to provide a platform for companies, governments and civil society to work together. Although there is a lot to learn, TFA is already very active in convening to support landscape and regional initiatives allowing rapid development.

Coalition Members Commitments

4.1 Participate in landscape and jurisdictional projects relevant to own commodity supply chain

4.2 Engage with priority origins, aiming to reduce deforestation and conversion and to support forest positive production through promotion of sustainable forest practices, including certification where appropriate as well as integration with activities in the wider landscape to reduce pressure on forests and improve livelihoods of local communities

Notes: KPIs will be developed over the coming months.

Coalition Actions

With support from TFA

• Q1 2021: Identify opportunities for engagement in existing and emerging landscape and jurisdictional initiatives and with governments in priority countries/regions (see Element 3) to:
  a. Where appropriate, support and promote credible third-party certification schemes, including smallholder inclusion in certified supply chains, and/or
  b. Actively support approaches to sustainable forest management in priority origins where certification is not an option, such as initiatives focusing on PES, forest conservation, smallholder livelihoods, land and forest governance, and/or
  c. Actively support approaches to restoration

• Q1/Q2 2021: Agree expectations of Coalition Members when engaging with landscape and jurisdictional initiatives, including objectives and role of both manufacturers and retailers

• 2021: Provide Guidance for member companies to engage with these projects

• Q1 2021: Develop KPIs for individual and collective reporting

• 2021-2022: Build and actively support collective initiatives to share good practice on sustainable forest management among Coalition members and across the wider sector, including a toolbox with methods/tools that could be used in different landscapes/regions

Individual Actions

• Q4 2020/Q1 2021: Discuss and agree internally on resources available to support landscape and jurisdictional initiatives in priority origins

• 2021: Develop internal plans to engage in these landscapes and begin implementation

• 2021-2022: Build understanding and share learning within and beyond the PPP WG
Element 5: Transparency & Accountability

Commitments & Actions
5. Transparency & Accountability: Commitments & Actions

Overview: Accelerating progress and building credibility through ongoing transparency and accountability is an important part of the Coalition approach. This builds on the insight from the review of the implementation of the original 2020 deforestation commitment, that there are limitations to the effectiveness of relying on commitment to a long-term goal with little interim information provision, monitoring of progress or collective review of actions to make them more effective.

Coalition Members Commitments

5.1 Disclose publicly company policies and goals to deliver on the PPP Forest Positive commitments (See Element 1)

5.2 Track, verify and report on progress with implementation of the Roadmap for own supply, suppliers and priority landscapes

Notes:
There is a Coalition-wide Action on Transparency and Accountability, to provide consistency between different commodities and leverage the combined influence of the Coalition.

Coalition Actions

- Q1-Q2 2021: Agree on minimum transparency, monitoring and reporting requirements for Coalition members (guided by AFi or equivalent) and begin reporting
- Q1-Q2 2021: Informed by existing guidance (e.g. AFi) adopt tools or approaches to track and report progress through development of Guidelines (see previous sections) including templates to support common and consistent reporting, particularly for data for shared reporting by CGF
- 2021-2022: Support provision of credible and consistent information on key issues such as rates of deforestation in the sector (drawing on existing sources such as WRI, TFA etc.)

Individual Actions

- 2020: Confirm CEO-level support to proposed Coalition transparency and accountability
- 2021: Report publicly at least annually, and more frequently where agreed, on all the KPIs agreed by the Coalition (see Elements 1, 2 and 4)
- 2021: Support shared reporting if/when agreed by the Coalition providing agreed data in a timely way
