

Unilever

Coalition member since 2020 | As of September 2023, palm oil, palm oil derivatives, direct soy, embedded soy, and paper, pulp, and fibre-based packaging (PPP) are material commodities for Unilever.

The following table includes a list of each Key Performance Indicator (KPI) for each material commodity, along with the company's 2021, 2022 and 2023 reporting record. The record includes the following responses:

- “Yes” indicates a company is reporting against a KPI and reporting quantitatively where indicated
- “Yes – narrative reporting” indicates a company is reporting qualitatively against a quantitative KPI
- “Not yet reporting” response indicates a company is not yet reporting on a KPI
- “N/A” indicates a KPI was not established in a given year

Companies have also provided information on their performance against appropriate KPIs, along with methodologies and targets. This information has been self-reported by companies and verified by Proforest.

Links are provided to information when a company is reporting (“Yes”) against a public information requirement, and when a company is reporting qualitatively (“Yes – narrative reporting”) against a quantitative KPI.

For a full methodology on the Forest Positive Coalition's reporting process, including a list of all KPIs and public information requirements, visit transparency.tcgfforestpositive.com
