

COLGATE - PALMOLIVE

Coalition member since 2020 | As of September 2025, palm oil (CPO and PKO), palm oil derivatives, direct soy, embedded soy, and pulp, paper and fibre based packaging are material commodities for Colgate-Palmolive.

Theory of Change | Halting deforestation and conversion and transforming key commodity sectors to forest positive.

At the heart of our work lies a comprehensive theory of change that guides our work towards a forest positive future. By recognising the interconnected challenges within commodity supply chains, we can drive meaningful change that not only protects our forests but also enhances the well-being of communities linked to production landscapes. Our approach emphasises collaboration with diverse stakeholders and a commitment to transparency, ensuring that we can effectively address deforestation and promote responsible practices. Through our collaborative efforts, we aim to transform our supply chains and create sustainable outcomes that resonate across the industry.

The following report includes information on this member company's performance reporting against each of our Forest Positive Coalition's Key Performance Indicators (KPIs), highlighting their progress in the three key areas that make up our Theory Of Change: DCF Supply, DCF Suppliers and Forest Positive Landscapes. For a full methodology on the Forest Positive Coalition's reporting process, including a list of all KPIs and public information requirements, visit <https://transparency.tcgfforestpositive.com>.

DCF Supply | Element 1: Own Supply Chain

We have recommended targets to source DCF palm oil, soy, beef and PPP (paper, pulp and fibre-based packaging) alongside a people positive approach which promotes positive outcomes for the communities linked to production landscapes.

Commodity	KPI Number	% DCF publicly reported in 2025	DCF methodology	Scope of reporting
Palm Oil (CPO/PKO)	1.5	79%	FPC methodology (paths B & C)	All PO & PKO materials
Palm Oil Derivatives	1.5	36%	FPC methodology (paths B & C)	Top 94% of palm derivative suppliers in current scope
Direct Soy	1.8	5%	FPC methodology (paths A & B)	All direct soybean meal and oil and soy-based derivatives (excludes indirect and embedded soy)
Embedded Soy	1.8	Not reporting	n/a	n/a
Pulp, Paper and fibre based packaging	1.8	85%	FPC methodology (recycled + path A)	All volumes
Beef and cattle derived products	1.6	Not material	n/a	n/a

DCF Suppliers | Element 2

We support suppliers to transform their production of these key commodities to DCF in line with our members' commitment. Direct engagement in supply chains helps us understand where deforestation, conversion and human rights risks may occur so we can recommend actions to be taken by members to support improved supplier performance.

Commodity	KPI Numbers	Engaging suppliers on commodity	Tracking & reporting supplier performance & progress
Palm Oil (CPO/PKO)	2.2, 2.3	Yes	Yes
Palm Oil Derivatives	2.2, 2.3	Yes	Yes
Direct Soy	2.2, 2.3	Yes	Yes
Embedded Soy	2.2, 2.3	Not Yet	Not Yet
Pulp, Paper and fibre based packaging	2.3, 2.4	Yes	Yes
Beef and cattle derived products	2.3, 2.4	Not material	Not material

Forest Positive Landscapes

We address systemic issues in the 'production landscapes' of these commodities so they are transformed into forest positive areas. Strategic investment and collaboration will drive forest conservation, ecosystem restoration and improved livelihoods.

The following table includes a list of each Key Performance Indicator (KPI) for each material commodity, along with the company's 2024 reporting record. The record includes the following responses:

- "Yes" indicates a company is reporting against a KPI and reporting quantitatively where indicated
- "Yes--narrative reporting" indicates a company is reporting qualitatively against a quantitative KPI
- "Not yet reporting" response indicates a company is not yet reporting on a KPI
- "N/A" indicates a KPI was not established in a given year

The DCF commodity methodologies are subject to updates based on commodity working group discussions and wider sectoral alignment. The 2025 reporting cycle is based on the following DCF methodology versions:

- Palm Oil DCF Methodology Version 0
- Soy DCF Methodology Version 1.1
- PPP DCF Methodology Version 0
- Beef DCF Methodology present in Roadmap Guidance version 1.3

This information has been self-reported by companies and verified by Proforest. Links are provided to information when a company is reporting ("Yes") against a public information requirement, and when a company is reporting qualitatively ("Yes narrative reporting") against a quantitative KPI. 1.0 - Element 1: Own Supply Chain								
1.1 - PPP Sourcing Policy including commitment to the forest positive goals	Yes - Colgate-Palmolive is committed to sourcing paper and packaging from responsibly managed forests and recycled sources. By 2025 Colgate Palmolive will only source pulp and paper-based packaging materials from recycled and responsible sources. This approach will be achieved through a combined use of certified sustainable products and verified recycled materials and limiting the sourcing of virgin fiber based materials from high risk countries. By 2030, all pulp and paper packaging materials sourced by Colgate will be verified as deforestation and conversion free (DCF). Colgate will align with the Consumer Goods Forum, pulp and paper packaging DCF Methodology for our reporting. https://www.colgatepalmolive.com/en-us/sustainability/our-sustainability-policies/no-deforestation	Yes		Yes - Colgate-Palmolive is committed to sourcing paper and packaging from responsibly managed forests and recycled sources.
